

Camano EMI Instructions

Let the E.M.I. speak for you when you aren't able

INSTRUCTIONS FOR FILLING OUT EMI AND HOW TO DISPLAY INFORMATION

When filling out form please use Blue or black ink and make spelling legible.

Included in the EMI kit is a 2 X 2 inch sticker. The small sticker is meant to be placed near the front door in a visible place so that responding fire crews will be able to spot the sticker. This lets the crews know that there is a EMI located in the refrigerator.

MD and Hospital Information: Please write down the name and phone number of your personal family physician and which Emergency room you would like to be transported to in case of an emergency. Please be aware that depending on certain conditions, we may recommend transporting you to a different hospital.

Emergency Contacts: Please list three people that in the case of an emergency can be contacted to help give information, get ahold of next of kin and/or come assist EMS personnel with locking up house and taking care of pets.

POLST form or DNR paperwork: Please document if you have a POLST form from your physician that states if you would like certain medical treatments, it also states whether or not you would like to have CPR done on you in the case of cardiac arrest. DNR (Do Not Resuscitate) gives direction to EMS personnel on whether or not to attempt CPR.

Medications, Medical Conditions and Allergies to Medicines: Please list any prescribed medicines and dosages. Please list any pertinent Medical conditions i.e. Diabetes, COPD, and Hypertension. List all Allergies to Medications not seasonal allergies. List any over the counter medications, herbal remedies, vitamins or supplements and recreational drugs taken regularly.

Pets: Please give us Pets names and locations of treats so EMS providers can make pets feel comfortable while their loved one is being treated. Any other useful information that would help with pets is also welcome.

Additional Instructions: special instructions and notes to the EMT's and Paramedics. This might include precautions for lifting you, or other special considerations the fire fighters might need to know.

When the EMI is completely filled out, place the EMI inside the supplied plastic bag. Roll and place the bag inside the EMI tube. Put the end caps on and place the tube anywhere inside your refrigerator. Be sure to place the small 2 X 2 inch sticker near the front door, someplace where responding fire crews will notice it.
